

## Torch for torchlight parade

### Items req'd

- soup can
- stick or 2x2 board about 3'-4' long
- dry wall screw
- drill and drill bit
- screw driver

### Directions

Drill a hole in the side of the soup can about 1/2" from the top. Loosely attach the can to a stick or 2x2 about 2" from the end with a dry wall screw or a nail. The can should hang freely from the stick and will always hang down if the stick is tilted down.

Bring an old sock to stick in the can for the parade.
